BY LIGHTCREST

MAXIMIZE SECURITY, MINIMIZE SPEND.

The most secure way to deploy cloud infrastructure
is also the most cost-effective one.

BUSINESS HIGHLIGHTS

- Realize up to 66% cost reduction over public cloud
- Reduce risk of malware and zero-day attack by 99%
- Bridge the gap between corporate and production security
- Eliminate big-iron compute, storage, and networking
- Spend more time building your business and less time managing cloud security
- Outperform the competition by shortening delivery cycles
- Increasing performance across your entire IT supply chain

TECHNICAL HIGHLIGHTS

- Software-defined compute, storage, and network function virtualization in a single solution
- High-Octane NVMe and All-Flash SSD based hyperconverged infrastructure
- IDS, IPS, and zero-day malware prevention in a turn-key solution
- Self-healing and scalable into the petabytes
- Managed cloud ops and 24x7x365 CyberSOC for threat mitigation

OVERVIEW

While cloud can be an amazing tool, the cost and security impact can be higher than expected.

Introducing Kahu, the software-defined cloud solution built from the ground-up for highly regulated environments.

Kahu allows enterprises to maximize performance at the lowest possible cost while bridging the gap between production and corporate security.

By providing the infrastructure, APIs, and services for secure infrastructure at scale, Kahu is the fulcrum for the modern cloud.
